

Forest Principles, Practices, and Stewardship for Landowners

6-Module On-line Course
Hosted by Alabama Cooperative Extension System

[Register Online](#)

This 6-module online course teaches forestry basics for landowners who want to start being more proactive with their forestland management.

Land management professionals will present information on topics such as determining the best forest type for your property, locating boundary lines and map reading, forest tree measurements, forest thinning for timber and wildlife, and forest product markets.

Learn at your own pace with the course wrapping up with an optional forestry field day where you can further your knowledge with hands-on activities and interact with forestry professionals and other landowners.

Course fee is \$40.00 and includes electronic notebook and course materials.

***Field day:** *Dependent on COVID-19 guidelines, several field day dates will be announced at a later date for interested participants for additional \$15 (**covers snacks, lunch, activities during field day**) to be held at Mary Olive Thomas Demonstration Forest in Auburn, AL.*
